

TARGET CROPS

All Crops

TIMING

During irrigation As top/side dressing

DOSE

100ml per bag of Urea

APPLICATION METHOD

Fertilizer coating

AVAILABLE SKUs

100ml and 1 Ltr

We don't promise greater yields...
WE GUARANTEE IT.

N-Charge™G uses patented Verdesian T5 polymer technology to make applied nitrogen (N) more available to the plant, supporting in-season Nitrogen Use Efficiency. N-Charge™G increases nitrogen uptake throughout the growing season.

WHY N-CHARGE™G?

NUTRIENT AVAILABILITY:

Polymer technology acts as an exchange resin, supporting in-season improvement of Nitrogen Use Efficiency.

NUTRIENT ACCESSIBILITY:

Increased availability of ammonium to the plant during peak Nitrogen use increases Nutrient Use Efficiency.

NUTRIENT UPTAKE:

Increases total Nitrogen uptake during the growing season to maximize grower Return on Investment (ROI).

Long Lasting Nitrogen Use Efficiency

- ✔ Next Generation T5 Polymer.
- ✔ Protects soil health and water quality.
- ✔ Can be stored indefinitely with no loss in quality.
- ✔ Works well in all weather conditions.

Increases Urea's Mileage

Benefits of N-Charge G™

- 1 Protects your nitrogen from potential loss to the environment by providing better uptake availability to the plant
- 2 Makes a plant stronger and healthier
- 3 Makes plant capable of yielding a better crop
