VERDESIAN
THE NUTRIENT USE EFFICIENCY PEOPLE®

AVAIL®

A VERDESIAN NUE SOLUTION™

AVAIL® phosphorus fertilizer enhancer makes phosphorous uptake more efficient for crops, resulting in upto 45% more phosphorous being accessible to crops. This means a higher yield and a greater ROI.

TARGET CROPS
All Crops

TIMING
During application of phosphorus fertilizer

DOSE
100ml/bag of DAP/SSP/NPK

APPLICATION METHOD
Coating on fertilizer granules

AVAILABLE SKUs
100ml and 1 Ltr

MADE IN USA

We don't promise greater yields…
WE GUARANTEE IT.

verdesianasia

HOW AVAIL WORKS ?

- AVAIL® is a resin-based technology with a charge of -1800 meq CEC.
- It attracts and binds with positive ions (calcium, magnesium, aluminium etc.) in soil, leaving phosphorous free for uptake by crop roots.
- Increased phosphorous accessibility by roots improving its solubility.
- AVAIL® promotes season-long phosphorus uptake by crop for optimum growth and higher yields.

KEY BENEFITS

1. Better early season crop performance.
2. More robust root and shoot system.
3. Less phosphorous soil build-up.
4. Increased yield and ROI.

Influence of soil **ph** on the soil **Phosphorus** availability
