Why CROPSYNC™ COMPLETE ?

CROPSYNC™ COMPLETE is proprietary combination of Verdesian's Polymer Technology and the Nutripaction™ process which creates a unique combination of micronutrition that offers improved nutrient availability and performance, ensuring your crops have nutrition on demand.

How it works ?

Optimal Dispersion

CropSync Granular Micronutrients provide optimal dispersion through our proprietary Nutripaction™ technology.

Enhanced Nutrient Use Efficiency

Delivers a more efficacious and economical granule by lowering the pH in the microenvironment around the granule, increasing availability.

Season-Long Performance:

Formulated using multiple sources, CropSync provides both immediate and prolonged availability of micronutrients.

Benefits of CROPSYNC™ COMPLETE

A. Increased availability of nutrients, thanks to co-polymer technology.

B. Stronger root and shoot system.

C. Increased yields and quality.
